

CHanGE & EarthLab

# Heat Health Risk Tool Internship

Payton Curley (she/her)

# About Me

## Education

- BS - Environmental Science
- Business Administration Minor

## Interests

- Equity & Climate Change
- Public Health
- Sustainable Business

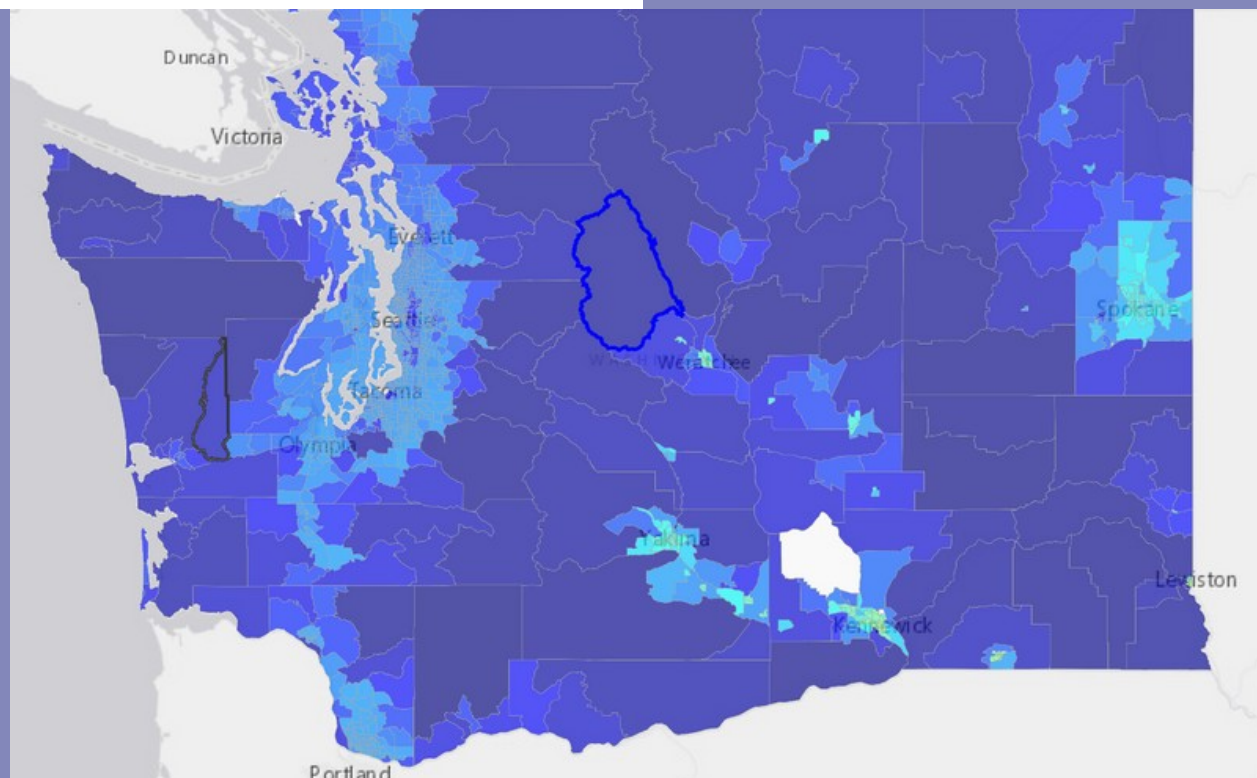

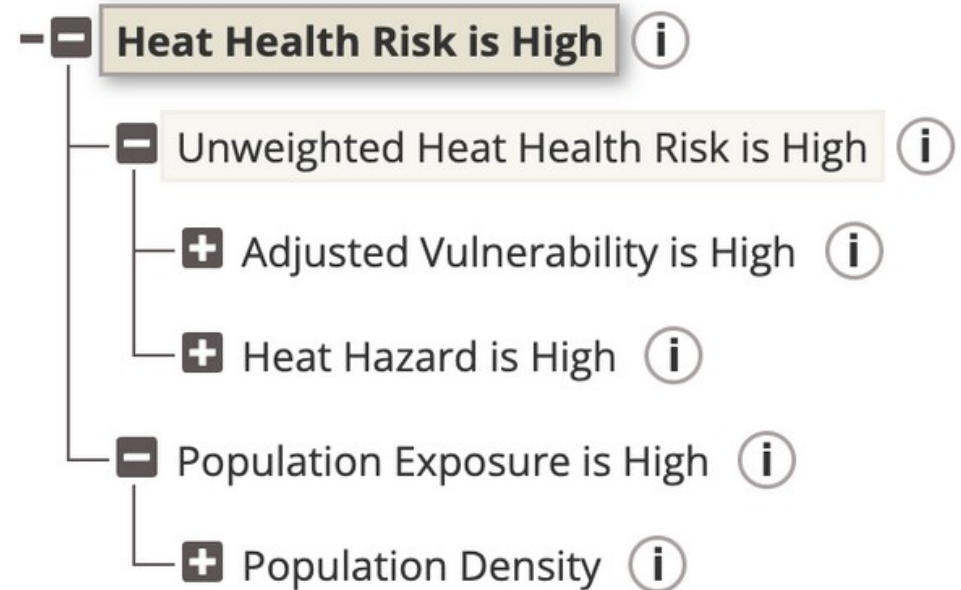

## Why EarthLab?

- CHanGE
- Professional Development
- User Interface & Data

# Climate Health and Risk Tool (CHaRT)

## Model node:

- Interactive web based tool mapping geographic distribution of heat health risk
- Guidance provides connection and context to problems people may face

# Projects

## Customer Discovery

Series of interviews with CHaRT stakeholders to understand their experience & general pain points

Information synthesis & problem solving

## Heat Action Plan

Identified areas of interest

Analyzed data in CHaRT to identify key themes or differences between areas

CHaRT development of a HAP upon selecting a specific area based on unique circumstances & needs

# Major Takeaways

Industry  
Insight

Interests

Professionalism

Personal  
Growth

# Thank you!
